

Listing ID: 56

Company Name: TB Turbo (Turboboost)

**Description: TURBOBOOST is the specialist tuning division of TB Turbo Ltd .

Unlike many people who offer chip upgrades all modified files are written on site by our own staff using the very latest software and not by third party companies . This allows us the freedom to listen to the customers requirements and tailor any modifications to the customers requirements .

Many vehicles can now be modified using the latest "FLASH" or serial port technology .This is a non invasive method of reprogramming the chip inside the ECU without the need to remove the ECU from the vehicle . This leaves no physical sign that the ECU has been modified .**
